High quality indoor and outdoor advertisement printing service practices, regardless of offering POLOANT CNC, Laser, Plexi Bending with all our equipment for our customers, Professional printing and cutting on materials such as Foil, Tarpaulin, Vinyl, Mech, Forex (Dekota) we are your solution partner by your application.

## APPLICATION OF INDOOR ADVERTISING

Indoor Digital Printing is a type of printing used indoors and outdoors. Photo quality is preferred in prints where details can be seen clearly. Prints such as Posters, Posters, Photo Prints, prints promoting products, closely visible prints are obtained from prints made with indoor digital machines.

As a result of printing a high-quality image from high-resolution digital printing machines, prints can be made in which details can be seen without errors at close range

We design your advertising images with alternatives by considering all the details suitable for the interior decoration of your company...

## VEHICLE COATING APPLICATION

There are many methods and materials that companies will advertise. Television, radio, newspapers, magazines, signage, advertising can be done on various tracks, such as billboard. Especially visual and print media ads, both temporary it challenges firms both from the point of view of its formation and from the point of view of the economy. VEHICLE CLADDING / VEHICLE CLADDING when the situation becomes obvious it is considered to be both more economical and more useful. Because your company vehicle is always in traffic you will have a traveling billboard. For this reason, Vehicle dressing / Vehicle coating is very important. Since your car is constantly in traffic, it reaches more and more masses. You can see all our reference examples on our website about the subject of vehicle dressing / Vehicle coating. In these References, you can find all the varieties related to Vehicle Cladding / Vehicle Cladding.

# Graphic Web Design

Graphic design can convey a message, enhance an image, or express a thought to visualize text and images in a perceptible and visible plane, 7 a creative process that involves organizing it in two-dimensional or three-dimensional process. Printing, Display, Motion Picture, Animation, Interior Design, Packaging Design it can be applied in a way that it is not digital or non-digital in many environments, such as. In graphic design and graphic arts, the basic principles of visual arts are alignment, balance, contrast, application, motion, image, ratio, proximity, repetition, rhythm and unity prevail.

Web graphic design as a topic that is closely related to the field of graphic design it can be handled. but as a separate branch in itself, it has a very large area occupy. A classic graphic designer working in the field of web design i think that the classical design understanding and habits are not enough when it starts he will notice in a while that he also needs to gain experience for this job will not be so difficult to realize. Presented and studied today web designs completely eliminate users from being an artistic work it has a more minimalistic design and user-friendliness without tiring, but on the website he chose the path of simplification for their navigation. Although it has not yet been standardized it contains its own rules together.
